

PLATO® Correlation Services

- Know the true value of your existing instructional materials

Meet NCLB mandates by mapping your instructional content to standards

Utilize technology to speed standards correlation results and lower costs by knowing when to replace textbooks and supplemental materials

Make a different kind of data-driven decision.

There's value in what you already have.

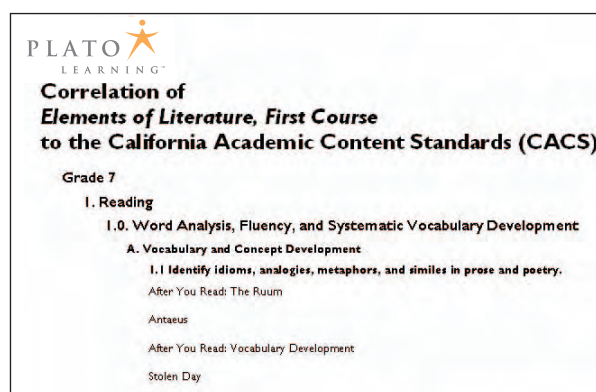

Are you thinking of replacing your textbooks to ensure meeting current standards? The No Child Left Behind Act (NCLB) mandates that schools and districts correlate their instructional materials to standards. Do you know how well your current materials correlate? What if you could show that your existing textbooks and materials support current standards, and you could save money by not replacing them this year?

Be an educated consumer.

Correlating content is a specialized skill that takes time and money, two areas of major concern for most schools and districts. PLATO Learning helps you know the value of your current instructional content. PLATO Correlation Services use sophisticated technology and unbiased experts to provide robust mapping of instructional materials to your content standards—saving you time and precious resources. Whether you need to map instruction to content or just want to see if your textbooks need to be replaced to meet current standards, PLATO Correlations Services can help.

PLATO Learning correlates all types of instructional content, including:

- Textbooks
- Supplemental materials
- Local assessments
- Benchmark and other assessments
- Web sites
- Instructional software
- Model curricula

PLATO Correlation Services provide customized correlation coverage maps based on your needs.

Assess what you already own.

Using specialized technology, PLATO Learning helps you assess what you already own. Our database contains over 30,000 learning objectives mapped to hundreds of national, state, and provincial standards. You receive a detailed coverage report that shows what your content maps to and where the gaps exist. With detailed information you can make informed decisions about replacing instructional materials.

Wouldn't it be great if you didn't have to replace your instructional materials this year? For more information about how PLATO Learning can save you time and money through correlating content, please call 800.44.PLATO or visit www.plato.com/correlations.

Real learning. Real results.™
