

PLATO® K–6 Prescriptive Learning Solution

■ Prescriptive assessments personalize learning

Interactive lessons are fun and engaging

Modular instruction supports skill levels from remediation to enrichment

Practice and reinforcement increase skills in reading, mathematics, science, social studies, and cross-curricular projects

Online management tracks progress

"Half of my class is above grade level in math and reading, and I attribute a lot of that to PLATO Learning. I don't have an example of just one student who loves to work on PLATO® Content—I have a whole class. In fact, one boy would rather work on a PLATO Learning lesson than play games on the Internet."

—Linda Newkirk, teacher, Gold Canyon Elementary School, Apache Junction, Arizona

Personalize instruction for each student and produce solid achievement gains in a fun, engaging environment. The PLATO® Prescriptive Learning Solution will help you reinforce academic skills and articulate individualized learning plans that focus instructional time on the areas students need most.

Theme-based, modular instruction

Students explore real-world environments and complete activities that reinforce mathematics, reading, social studies, science, and multi-disciplinary skills. Lessons feature online activities and reproducible worksheets that complement classroom instruction and provide additional practice as students work toward mastery.

Teachers can model lessons for the entire class or learners may work independently at computer stations. Online mentors lead students through activities and help them progress independently with a variety of tools, including dictionaries, calculators, base ten blocks, and manipulatives.

Students estimate sums while on Puffin Island, learn place value and addition while traveling down the Buffalo National River, or read expository texts while on an expedition to the Great Barrier Reef.

Assessment

A skills inventory is available within the curriculum, providing K–3 prescriptive assessment, which places students in appropriate activity levels while exempting them from those they have already mastered.

PLATO Learning's K–6 Prescriptive Learning Solution includes:

- PLATO® Beginning Reading (K–3)—support basals and textbooks with phonics, word recognition, comprehension, and vocabulary lessons.
- PLATO® Reading Explorations (4–6)—reading comprehension strategies are developed as learners read expository texts with integrated science and social studies content.
- PLATO® Math Expeditions (K–6)—strengthens core math skills as learners embark on adventures to solve math problems.
- PLATO® Cross-Curricular Projects (K–6)—project-based activities reinforce mathematics, reading, social studies, and science lessons with basic to advanced content that connects learning with everyday life.
- PLATO® Professional Services—this solution is fully supported with professional development that helps educators effectively integrate technology into their curriculum and use assessment to prescribe personalized learning.

Create individual learning experiences for your students with the PLATO Prescriptive Learning Solution for K–6. Call 800.44.PLATO or visit www.plato.com to learn more.
