

PLUG-IN TEST FOR PLATO COURSEWARE

This procedure will allow you to check to make sure that all of the plug-ins necessary to access the PLATO courseware that you have purchased will run on your computers.

1. Make sure your computer is connected to the Internet. Open a browser and type the URL: <https://ple.platoweb.com/>
2. On the login page, you will be prompted for three pieces of information. Use the following data after accessing the page:

Account Login:	_____
PLATO Name	learner01
Password	password

3. Click the Assignments button and a list of assignments will be presented.
4. Select an assignment and click the **Open** icon.
5. Click on one of the lessons. If the proper plug-in is installed the lesson will open. If the plug-in is not installed, a small window will open with the message you do not have the plug-in and asking if you wish to install it. Click **OK** and follow the instructions to install the plug-in. After accessing the program, click Exit and follow the same procedure with each assignment.
6. Click on each of the courseware options in turn. Once the lesson loads, you may exit out.
7. When you have confirmed that all the courseware pieces will run you may log out as a Learner.
8. Contact your Customer Care Consultant or your Educational Consultant to confirm you are ready for staff development.
